

# THOMSEN

Comfort that breathes

 Made in Germany

# Comfort that breathes - for a relaxed and healthy sleep

Almost one third of our entire lives are spent in the bed. We sleep because we require a lot of new energy for our active life styles. Essential to that life style is how we sleep. This depends, above all, on the right mattress and pillow.

Apart from our sleep, the kind of mattress we sleep on, determines our physical fitness, well-being and overall health. Daily stress causes the loss of intervertebral fluids, affecting the movement of the discs. This leads to major discomfort and pain. During our sleep, these fluids are replenished.

So that we sleep really healthy, we need a comfortable sleep environment. THOMSEN has, therefore, solved a major problem when sleeping: the sweating, by using world's most breathable comfort foam- Vita Talalay Latex. This innovative material provides, with its open and breathable cell structure, an optimal sleeping temperature.

## The right climate is crucial. Make your lives comfortable all around.

THOMSEN uses high-tech upholstery and Vita Talalay Latex core for the production of its premium Talalay sleep products – mattresses, pillows and toppers. By using innovative and functional materials, THOMSEN has created a CLIMATE-COMFORT-SYSTEM to ensure optimum Climate-Balance in the bed.

Due to its modern, complex and highly technical manufacturing process, Vita Talalay latex is several times more breathable than ordinary latex or foams. It also regulates humidity and heat with greater efficiency. Due to its highly elastic and unique open-cell structure, the body heat is diverted through the pores. At the same time, Vita Talalay latex is quick to retain the required heat and as such ensures optimal temperature in the bed – so there is always a stable and hygienic sleeping environment in which you feel completely relaxed and comfortable.

## Mattresses should never be off the shelf... So that they really fit you.

Every person is unique. Therefore, they also need sleep products that meet their specific needs. At THOMSEN, everything is geared to meet the individual requirements of our customers.

We produce customized mattresses tailor-made to your bed sizes and individual body weights. We also provide special mattresses for babies and kids. Our mattresses are made to fit all kinds of beds, and are easy to maintain. Our pressure relieving and climate-regulating mattresses, with comfort and support properties, improve your sleep quality tremendously. Sleeping postures that disturb a restful sleep, are proactively avoided.

All THOMSEN products are made from high quality materials that are free from harmful substances and conform to Oeko-Tex 100 standards.

# The science behind Thomsen

**Latex**-Learning to breathe, Elasticity, airiness & softness

A precise mixture of natural and synthetic latex is mixed with air and stirred until an airy lather has been created, which is then poured into molds.

The air is sucked from the mold, creating a vacuum. The liquid naturally distributes itself throughout the entire mold. The air bubbles expand and form a homogeneous cell structure.

The mixture is flash frozen to -30° Celsius, enabling the cells to retain their round form. The cell membranes break open and link together to create an open-cell structure.

The material is heated and mixed with an environmentally friendly mixture of CO2 and air ensuring stability and airiness.

The mold is vulcanized at 115° Celsius; the cells continue to expand, giving the material its elastic properties. This latex core is further worked upon to create the high quality THOMSEN mattresses, pillows, and toppers.

## Thomsen creates the right sleep environment

THOMSEN uses high-tech upholstery and Vita Talalay Latex core for the production of its premium Talalay sleep products – mattresses, pillows and toppers. By using innovative and functional materials, THOMSEN has created a CLIMATE-COMFORT-SYSTEM to ensure optimum Climate-Balance in the bed.

- Regulates humidity
- Creates hygienic sleep environment
- Make you relaxed and comfortable

## Be particular in everything that surrounds you in your sleep

When we sleep, we need comfortable and well-designed sleep products that would help us get a good sleep so we can wake up fresh and relaxed to begin every day with renewed energy. The climate regulating, supportive and pressure relieving mattresses and pillows from THOMSEN have unique properties that enable you to sleep relaxed every night.

## A Heavenly Embrace

As THOMSEN offers customized products, the customers can choose an innovative material that combines the benefits of memory foam as well as the climate regulating properties of Vita Talalay Latex.

**THOMSEN-Vita Talalay latex**

This material reacts to pressure – gently cushioning your body.

It provides you with a deep and relaxing sleep, so that you are comfortable.

No matter in what position you sleep, it adapts to your body, without restricting your movements

# Sleep relaxed and healthy with THOMSEN Vita Talalay Mattresses

## Vita Talalay for relaxed sleep

Unique material that has great elasticity and bounce with a tender feel. It adapts gently to the individual body contours so the spine is kept in an anatomically correct position, & the muscles are relaxed.

# A relaxing sleep depends on just the right feel...

## THOMSEN Talalay Collection

Sleep comfort depends upon individual preferences and highly personalized "sleep-feel" of every person. THOMSEN offers tailor made solutions taking care of the special needs of its customers so that you can find the perfect mattress for your sleeping environment.

### THOMSEN - Air

The THOMSEN Air mattress with a soft-configuration includes a specially designed comfort-layer consisting of the luxurious, breathable Talalay Latex that gently conforms to the body shape. This ensures a wonderful, pressure free and light feel as if you are sleeping on air. The additional support layer provides optimal support to the spine and **prevents pain in the bones, joints and muscles**, thus providing a relaxing sleep.

### THOMSEN - Bliss

The THOMSEN Bliss mattress comes with a medium-configuration and creates a slightly stronger feel. This is due to a higher density comfort layer, which, in conjunction with the THOMSEN support layer provides for **optimal pressure relief, support and a blissful sleeping experience**.

### THOMSEN - Paradise

The THOMSEN Paradise mattress with a firm, supportive feel is a great mattress for those who like firm, yet comfortable sleeping surface. We have chosen a unique combination of the comfort-layer and support-layer that creates a balance between **gentle support and pressure relief, guaranteeing the feel-good effect**.

### THOMSEN - Luxus

The THOMSEN Luxus mattresses are the purest Talalay experience and offer ultimate luxury. **Made with 100% Talalay Latex**, these mattresses conform precisely to your shape to cushion and support you perfectly and offer maximum breathability. Available in soft, medium and firm configuration.

### THOMSEN - Comfort

The Thomsen 8 inch latex has a soft, medium and firm configuration that includes a specifically designed comfort layer consisting of the luxurious vita talalay latex that gently conforms to the body shape. This ensures a comfortable and pressure free sleeping surface. The additional support layer provides optimal support to the spine and prevents pain in the body because of sleeping on uncomfortable surfaces and thus, ensure a relaxed sleep.

somnio

Everything for the highest sleeping comfort.  
To help you find exactly the right thing.

## THOMSEN Somnio Collection

Since our inception, one of our most crucial aim has been to make sure our customers feel fresh every morning after enjoying a comfortable sleep on our mattresses and pillows. Throughout our journey, we have constantly tried to mix innovation with luxury, with the aim to come up with sleep products that can deliver amazing comfort to our customers. We have always put a lot of emphasis on research in order to make sure that **all our sleep products should act as a rejuvenator, by helping body muscles to relax.**

Keeping with tradition, THOMSEN developed its new line of Somnio mattresses **made of high quality memory foam** that significantly **improves the sleep quality of our customers at an affordable price.** In 1966, **NASA** developed Visco-elastic foam to protect the astronauts from massive G-Force during launch. Same technology has been adapted in our **Viscoelastic Somnio mattresses.**

These mattresses are temperature and pressure sensitive, due to which they adapt perfectly to the body shape, offering excellent support and great comfort by eliminating the pressure points. Due to their special characteristics, these mattresses provide excellent muscle relaxation, thus enhancing their rejuvenation and thereby **reducing the backaches and neck pains.**

# THOMSEN Somnio mattresses for a comfortable sleep and better life....

## Superior memory foam

Superior Memory Foam Mattress for revitalizing and comfortable sleep.

## Temperature sensitive

Responds to body temperature and adapts to body shape.

## Pressure relieving and rejuvenating

Relieves pressure points, enhances the blood circulation and improves rejuvenation of muscles. Reduces tossing and turning at night that is essential for a deep and restful sleep.

## Supportive and relaxing

Supports the spine and joints for relaxed muscles and relief from back and neck pain.

## OekoTex 100

Free from harmful substances. Safe for baby skin also.

## No motion transfer

No disturbance due to movement of the sleeping partner.

## Washable Cover. Advanced performance Fabrics

Somnio mattresses are made with washable covers using advanced performance fabrics.

**Tencel:** a soft, natural and environment friendly fabric, that offers excellent moisture and temperature control properties.

## Space technology

Foam made with Technology developed by NASA.

## Durable

10 year warranty\*.

## THOMSEN Somnio Collection Somnio-Ocean

### Configuration: Soft & Firm

The innovative Somnio Ocean mattress has been developed by THOMSEN using the **revolutionary cooling gel technology with high quality memory foam**. It provides great comfort and support and helps reduce the heat build-up that is generally associated with memory foam mattresses. This mattress provides excellent pressure relief for a deep and restful sleep.

The mattress cover is washable and made with technical fabrics using groundbreaking technology, Outlast, that manages the heat and moisture proactively to provide an optimal sleeping climate.

## Somnio-Tranquil

### Configuration: Medium

The Somnio Tranquil mattresses are designed to provide a **sumptuous feel for a tranquilizing and comfortable sleep with excellent pressure relief and support**.

# dormio

Sleep. Redefined.

# Dormio Collection

## Dormio Latex with Memory Foam

Every person is unique. Therefore, everyone needs sleeping products that meet their specific needs. At Dormio, everything is geared to meet the individual requirements of our customers.

- 3cm Talalay Latex
- 3cm Memory Foam
- 10cm Polyurethane Foam

## Dormio Memory Foam

Every person is unique. Therefore, everyone needs sleeping products that meet their specific needs. At Dormio, everything is geared to meet the individual requirements of our customers.

- 3cm Memory Foam
- 12cm Polyurethane Foam

## Dormio Latex

Presence of Vita Talalay Latex provides complete comfort. Dormio Latex has high breathability and moisture regulating property that provides healthy and hygienic sleep. Dormio vita talalay latex has 2.5 cm Vita Talalay Latex and 12.5 cm Polyurethane Foam. The Vita talalay latex takes the shape of your body while you are asleep, it gives support and comfort to all the parts of your body.

The top layer of latex contours around the body and makes your body straight by bringing all the body parts at one level, giving support to the spine. It provides zero partner disturbance effect.

- 2.5 cm vita talalay latex
- 2.5 cm polyurethane foam.

## Dormio Dual Comfort

Dormio's dual comfort mattress provides a versatile mattress that suits everyone. It offers both, soft and firm feel. Irrespective of the preferences, customer get to enjoy both the feels as it can be flipped around to choose the mattress feel that one wishes to use.

Dormio vita talalay latex has 6.35 cm soft high-resilience foam and 6.35 cm firm high-resilience foam. Both the layers of the mattress provides utmost comfort. The top layer gives a soft feel while creating a slight cushiony effect. While the bottom layer gives the firm feel to those who like firm sleeping surface.

- 2.5 cm soft high resilience foam
- 2.5 cm firm high resilience foam

## Right pillows are also no less important!

People today suffer from stiffness and pain in the neck and shoulders. This can be corrected by sleeping in anatomically correct positions. A good mattress is effective only if it is used with the right pillow. At THOMSEN, we have placed a special emphasis on developing pillows that compliment our mattresses. We have created a vast range of pillows – from classical to ergonomic and orthopedic, from anti-snoring pillows to tinnitus pillows, from neck support pillows to even music pillows. There is a pillow for everyone – a pillow that provides you with comfort and relaxation.

## Improve your sleep comfort with THOMSEN Vita Talalay Latex pillows:

Designed for your comfort, THOMSEN pillows have several advantages: Experience unmatched comfort by choosing the right pillow from our pressure relieving and temperature regulating Vita Talalay Latex collection. Due to their ergonomic design, our pillows ensure that the neck and shoulders are relaxed and the cervical spine is kept straight even in the sideways sleeping position.

## The optimum pillow height... Always a straight spine, for a relaxing sleep.

For a relaxing and refreshing sleep, it is particularly important to have the correct pillow height. This ensures that the spine is in an anatomically correct sleeping position. That is why THOMSEN has developed the **flexible VARIO SYSTEM**. This unique system is modular. Thus, it enables the **choice between a pillow height of 7.5 cm to 13 cm**.

With the THOMSEN VARIO SYSTEM, you can determine the ideal pillow height easily.

# Designed for your comfort, THOMSEN pillows have several advantages:

- The unique THOMSEN "Vario" System allows you to adjust the **height of your pillow - just as you like it.**
- Soft and elastic Vita Talalay latex used to produce our pillows adapt to the **contours of the neck and head for maximum comfort and relief.**
- **Therapeutic designs** provide optimal comfort.
- Reduce pain, snoring and sleep disorders.
- Create a comfortable and dry sleeping environment.
- Dust, mite, mold and mildew resistant.
- **Free from CFC, formaldehyde and harmful substances.** Conforms to OkeoTek 100 standards.

## The modular THOMSEN VARIO SYSTEM enables one to quickly and easily find the ideal pillow height.

The selection of the optimal pillow height comes down to two factors: the width of the shoulders and the softness of the mattress. The more the body sinks into the mattress, the lesser the height of the pillow is required. The less the body sinks, the greater the pillow height should be.

# Premium pillows "Made in Germany"

## Anti-snoring Pillow

Size: 62 x 30 cm

- The patented Anti-Snoring pillow works due to a specially designed, inflatable head-side-roller, which induces side sleep.

- Cover made with technical fabric for controlling temperature, bacteria and humidity. It is easy for spot cleaning & washing.
- Environmental friendly materials, conforming to Oeko Tex 100 standards, which means it has been tested for harmful substances and poses no risk to health.

# Measuring Your Mattress

## STEP 1:

Remove everything from the bed such as pillows, mattress topper and sheets by making sure your mattress is bare while taking the measurement.

## STEP 2:

Measure the height and width of the mattress from one edge to another edge. This would be left seam to the right seam for width and from the top head to the bottom foot for length.

Measure the width and the length of your mattress from one outer edge to the other outer edge.

## STEP 3:

Make sure that ruler or tape measure flat on the mattress.
